Art Unit: 3762

Response to Arguments

- 1. This application contains claims 42-83 drawn to an invention nonelected with traverse in Paper No. 4. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
- 2. The proposed amendment will not be entered because it introduces new claims (claim 106) without canceling an equal number of finally rejected claims. Further, the insertion of "wound healing", "wound treating" or "individual" in claims 1, 85, 87, and 102 would require further search and consideration. The deletion of "wounded soft tissues, bone tissues, cancerous tissues, nerve pathway tissues and other body tissues" in claim 85 would require further search and consideration.
- 3. Applicant's arguments filed 4/15/2003 have been fully considered but they are not persuasive.

In response to applicant's argument that Browner, Russek, Ostrow, Alon, or McLoed are not healing apparatuses, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

Browner, Russek, Ostrow, Alon, or McLoed all provide therapeutic treatment of the human body and are thus, healing apparatuses.
